

elements™ e-motion

Endodontic Motor

Introducing elements™ e-motion with next generation adaptive motion technology.

Touch-Screen Interface

Better Visibility & Access

Smart Technology

Ergonomic Design

Features

100% German made, with the reliability you expect, and the performance you demand.

Touch-Screen Interface

The intuitive, full-colour touch screen allows easy customisation of up to five pre-sets from a database of 196 files.

Better Visibility and Access

Handpiece with a smaller head for better visibility and easier posterior access.

Smart Technology

Enhanced Adaptive Motion algorithm enables higher cutting efficiency, with greater protection against breakage and deformation.

Ergonomic Design

Compact and lighter motor with four handpiece mounting options for a more comfortable user experience.
